DIGITAL DATA TECHNOLOGIES, INC. PROVIDING KEY SOFTWARE AND SERVICES TO THE STATE OF CALIFORNIA'S NG9-1-1 INITIATIVE THROUGH A PARTNERSHIP WITH SYNERGEM TECHNOLOGIES

 March 23, 2020

Columbus, OH: As a strategic partner to Synergem Technologies, DDTI will provide NENA i3 compliant software to two California regions representing 261 emergency call centers processing 50% of the State's 9-1-1 calls. DDTI's core services include an Emergency Call Routing Function (ECRF), Location Validation Function (LVF), Location Database (LDB), Spatial Interface (SI) and MSAG Conversion Service (MCS).

The Northern California Region represents 166 emergency call centers providing service to 34 counties, including the San Francisco Bay area. Through Synergem, DDTI's solutions will also support CenturyLink's Next Generation 9-1-1 services to 95 call centers in the State's Southern Region, which includes Orange County and San Diego.

 "DDTI is honored to be working with Synergem to provide National Emergency Number Association (NENA) i3 compliant software and services to support the California Governor's Office of Emergency Services (Cal OES) initiative. The rapidly growing market acceptance of our capabilities reflects DDTI's commitment to support 9-1-1 professionals with the very best capabilities," Ron Cramer, DDTI President.

About DDTI: Since 1998, Digital Data Technologies, Inc. (DDTI) has been providing state-of-the-art software and GIS services to the public safety industry and local government agencies. At the forefront of Next Generation 9-1-1 (NG9-1-1), DDTI provides NENA i3 compliant software and GIS services that ensure the reliable and timely routing of emergency calls. Every day, our solutions protect the lives and property of millions of people. To learn more, please visit **www.ddti.net.**
